CEE COLORECTAL EVENT: Innovations in Rectal Cancer Surgery TaTME

Department of Surgery, University Hospital Brno, Masaryk University,
Educational Centre for Practical Anatomy
Brno, Czech Republic

Welcome

Johnson & Johnson welcomes you to our CEE colorectal program “Innovations in Rectal Cancer Surgery TaTME” organized in cooperation with Department of Surgery of University Hospital Brno.

We are actively working to ensure access to the best treatments, improving the standard of care and driving adoption for the benefit of patients, customers and healthcare system.

The course will help surgeons to become familiar with pros and cons of the TaTME technique. This requires both specific anatomical and technical skills.

Educational program consists of theoretical part and practical part. Theory will cover indications, anatomy, different patient conditions, perioperative management, procedural steps, complication management, follow-up. During practical part on first day the participants will observe commented live broadcast of TaTME surgery supported by records of interesting parts from other operations. Discussion and opportunity to continuously interview surgeons will be facilitated. The second day they will get opportunity to practice TaTME on freshly frozen cadavers at Educational Centre for Practical Anatomy.

I wish you a very instructive course!

Yours sincerely,

Jana Puhlovska
